

Dungog Shire Council Delivery Program 2013 - 2017 (Amended)

Original Adopted by Council
27 June 2012.
Amendment adopted by Council
26 June 2014.

DUNGOG SHIRE COUNCIL DELIVERY PROGRAM 2013-2017 (amended)

The following Vision and Mission Statements are the basis of Council's Strategic direction. These Statements were regularly reinforced to Council through the community engagement process associated with the development of the Community Strategic Plan.

The **VISION** for Dungog Shire is:

"A vibrant united community, with a sustainable economy. An area where rural character, community safety and lifestyle are preserved".

The Council's **MISSION** Statement is:

"To manage, enhance and protect, the resources of the Shire, in consultation with the community".

The delivery program is the next stage in the Integrated Planning and Reporting process. It is required to address the objectives and strategies outlined in the Dungog Shire Community Strategic Plan.

The Planning and Reporting guidelines as issued by the Division of Local Government further outlines the basic structure of the Delivery Program.

The Delivery Program must inform and be informed by the Resourcing Strategy, it must address the full range of Council's operations and allocate high level responsibilities for each action or set of actions.

Also financial estimates for the four year period must be included in the Delivery Program.

Funding the Future

The development of the Council's Delivery Program has been focussed on the ability of the Council to provide services and support within the financial means of the Council.

Delays in the development of Council's Asset Management Strategy has caused a "flow on" effect in relation to the development and reliability of Council's initial 10 year Long Term Financial Plan.

Whilst the Long Term Financial Plan should be used to inform decision making and establish priorities until the Asset Management Plans are refined and a review of asset standards and service levels is undertaken in many operational areas of the organisation a "status quo" remains in existence.

Councils initial delivery program was only developed in 2012 in accordance with the integrated planning & reporting guidelines. The Local Government Act requires that the new Council should develop a new delivery program to commence 1 July after being elected.

The Council reviewed the 2012-2016 delivery program in conjunction with Martin Bass from the University of

Technology on 9 February 2013 with a further session undertaken on 23 April 2013 with Councillor input provided and minor modifications were made to the delivery program to reflect current community issues.

Since the review of the delivery program the local government independent review panel has completed their review of Local government and their final report that was presented to the Minister for Local Government in October 2013 was released publicly in January 2014.

The final report has maintained a recommendation that Dungog should be merged with Maitland City Council. Council has made a submission in response to this recommendation calling upon the State Government to fund a community engagement program and to undertake a statistically robust survey of our community.

During the development of Council's community strategic plan there was a lot of noise from the Dungog community sessions as regards the maintaining of the Council into the future. That noise was not as evident during the other engagement sessions held across the Shire accordingly it is in the Councils interest to ensure

that any future decision which is made in regards to the merger proposal is not considered until the community has been adequately informed of the various benefits/issues that could arise from merger.

Every six months a report on the progress against the strategic targets is required to be submitted to Council and community.

The State Government infrastructure renewal loan borrowing initiative will have to be seriously considered and the Council must have the capability to withstand a NSW Treasury financial review as part of the application process. Such process may provide the Council the opportunity to invest in the renewal of certain infrastructure with a 3% interest subsidy. However the offer only extends to loan borrowings of a maximum of 10 years accordingly the Council needs to be mindful of our debt service level.

Within the document Council's financial forecasts are limited to the production of pie charts and the community should be guided by the Councils operational plan as regards the Councils projected financial position.

The charts are used to graphically represent the sources of revenue that fund the various activities of Council and the key expenditure categories. Council's Operational Plan provides detailed costings by functional areas for the period 2013-2017. A financial summary for 2013-2017 is outlined at the end of the main document and has been revised to encapsulate the residual term of the Delivery Program.

If alternative funding streams are not secured into the future then Councils options will be limited to making a Special Rate Variation submission to IPART, cutting back on levels of service and or selling Council assets.

Measuring and Review

Monitoring of performance indicators or tracking indicators of progress involves the need to ensure that elements are meaningful and can be reported to Council and the community.

Also to enable the triggering of management responses in the event that thresholds/targets are not being met.

There has been some minor changes to the Delivery Program as a consequence of

several changes in legislation including the new swimming pool registration and monitoring process, the establishment of Local Land Services (LLS) has also meant that there has been a change in the relationship as Council used to accommodate an education officer from the Catchment Management Authority within our building. Certain capacity changes have been made that reflect deadline extensions for review of Councils pricing policy for sporting and recreational activities, the review of passive recreational facilities and the new Sec 94 Plan all of which relate to the Executive Manager Infrastructure & Assets areas of responsibility.

The amendments to the Delivery Program are only minor in nature however it is proposed to re-exhibit the document at the same time as the Operational Plan.

Council must review the Delivery Program each year when preparing the Operational Plan.

The amended Delivery Program must be publicly exhibited for 28 days and public submissions must be accepted and considered before the final Program is adopted.

RESOURCING

Projected income for Natural Environment:

Projected expenditure for Natural Environment:

COMMENTARY:

Financial considerations: The predominant source of funding from the various Council functions is from Waste Management and Recycling Charges. Grant income is sourced from a Noxious Weeds Operational Grant, pensioner subsidies, with the other main revenue source being landfill tipping charges. Expenditure focus in materials and contracts with Waste Management contractor accounting for the majority aside from employee costs in relation to waste management, noxious weeds and environmental protection activities.
