

POLICY TITLE EFFLUENT DISPOSAL FOR UNSEWERED 2A PROPERTIES

VERSION III: Adopted 21 July 2009

Last reviewed: 21 July 2009

OBJECTIVES

To provide guidelines for the disposal of effluent on unsewered 2A properties in the Dungog Shire

POLICY STATEMENT

Within the unsewered residential 2a planning zone, on-site sewage management systems for new dwellings will be required to install tertiary treated effluent management systems in accordance with the relevant Australian Standards, except in the proposed sewerage areas of Clarence Town where the use of effluent pumpout systems will be allowed for new buildings on existing 2a properties.

However applicants are advised the property in the future will be required to connect to the sewerage scheme when available
