

RECYCLING

because we care..

Waste management is one of the greatest environmental issues facing our society today, but by working together we can do our bit to protect the environment for future generations. Please be conscious of what you are sending to landfill by aiming to reduce, reuse, recycle. Why not purchase a compost bin and reduce your footprint a little bit more?

Why?

For every 1 tonne of paper that is recycled you save...

- 4100kw of electricity
- 2.5 barrels of oil
- 32000 litres of water
- 13 trees
- 4 cubic mtrs landfill

AND NOW... ACCEPTING SOFT PLASTICS!!

waste management facility

Short St, Dungog
